Examiner's Amendment

1. The terminal disclaimer filed on 5/5/06 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 6,884,832, US Patent No. 6,969,737, US Patent No. 6,858,664, any patent granted on Application Number 10/706,386 and any patent granted on Application Number 10/718,223 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Richard Anderson on May 19, 2006.

4. The application has been amended as follows:

Claim 54: Insert "wherein the liquid" between "claim 53," and "is a solvent" such that the claims is "The method of claim 53, wherein the liquid is a solvent solution comprising 2-ethylhexyl alcohol".

Statement of Reasons for Allowance

5. The present claims are allowable over the closest prior art Sanderson et al (US 4,077,926), D'Sidocky et al (US 5,985,963), and Oshiyama et al (US 5,985,963).

The present claims are drawn to a thermoplastic polymer composition with an adhesive resin and ester.

Art Unit: 1714

Sanderson discloses an acrylic resin with a phenol-formaldehyde, melamine-formaldehyde, and alkylated melamine-formaldehyde resins that are present in amounts from 0.1-10%, and tackifying monomer meet the requirement of the ester of formula 1 when R^2 is C_3 . Accordingly, the C_3 embodiment has now been cancelled. Thus, Sanderson is not applicable to the claims.

D'Sidocky discloses rubber compositions (including PVC) that exhibit good adhesion properties to aramid reinforcements in the tire. The composition comprises melamine adhesive resins. Table 1 discloses methylene ester of rosin in the composition.

D'Sidocky does not disclose esters that meet the requirements of the formulae in the present claims.

Oshiyama discloses a fiber treating process for which is suitable for tire cords using esters that correspond to the esters of formulas 1 and 2. Oshiyama does not disclose an adhesive resin.

The combination of D'Sidocky and Oshiyama is would not have been obvious to one of ordinary skill in the art because one would have to use a carboxylic ester in lieu of the rosin ester in D'Sidocky, and there is no motivation to do so, particularly since the ester in Oshiyama is used as a lubricant and D'Sidocky's composition is drawn to increasing adherence of aramid reinforcement to rubber. Adding a component taught as a lubricating component would effectively teach away from D'Sidocky's invention. Thus the combination is not applicable against the current claims.

Thus, it is clear that the above references do not disclose or suggest the claimed invention.

In light of the above, it is clear that rejections of record are untenable and thus the present claims are passed to issue.

Art Unit: 1714

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact Information

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Klosowski et al in US 2005/0194752 is a jointing composition with esters, adhesives, and polymers.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sandra K. Poulos whose telephone number is (571) 272-6428.

The examiner can normally be reached on M-F 7:30-4:30 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
